# Construction 2026

Line Walkers will be conducting leak detection at Tap 100 and Tap 170 throughout June as part of our ongoing system upgrade.

Construction is now underway following the delivery of 35 km of 2" pipe (four truckloads). During this construction season, we will continue replacing aging pipeline infrastructure with new materials. Our goal is to have zero kilometers of unused pipe remaining in the yard by the end of the 2026 construction season.

We appreciate the patience and cooperation of our members as this important work gets underway.
